

Hammam Abedalkadeer

Full Stack Developer

Amman, Jordan • +962 785 329757 • [Email](#) • [LinkedIn](#) • [GitHub](#)

PROFESSIONAL SUMMARY

Full Stack Developer skilled in MERN and PERN stacks, with strong experience in React, Node.js, Express, MongoDB, and PostgreSQL. Proven problem-solving abilities with a focus on building scalable, high-performance web applications and writing clean, maintainable code. Fast learner with strong analytical thinking and effective teamwork skills. Seeking a Full Stack Developer role to apply technical expertise and contribute to business-driven development.

EDUCATION

Bachelor of Science in Computer Science AI

al-Bayt University, Jordan

September 2021 – May 2025

Training Experience

Full Stack JavaScript Development – LTUC / Luminus Technical University College

July 2025 - January 2026 (Expected)

Key Tasks & Skills:

- Built full-stack web applications using MERN and PERN stacks.
- Developed responsive, user-friendly interfaces using modern UI/UX principles.
- Gained hands-on experience with database management (MongoDB & PostgreSQL).
- Strengthened problem-solving, teamwork, communication, and adaptability skills.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript(ES6+), React, Tailwinds, TypeScript, Redux

Backend: Node.js, Express.js, RESTful API Development, API Integration, Authentication (JWT, OAuth), Server-Side Rendering

Databases: MongoDB, PostgreSQL ,Database Design, NoSQL, SQL

Tools & Others: Git, GitHub, npm, Parcel, Vite, Axios, Postman, Version Control, Agile Development, MVC Architecture

PROJECTS

Modern Barber Shop Booking System

[StyleSync Project](#)

- Developed a full-stack web platform using React, Node.js, and PostgreSQL to manage barber appointments, services, and users.
- Implemented role-based dashboards and JWT authentication for secure access.
- Created responsive UI with real-time booking logic and an admin control panel.

Prescripto – Doctor Appointment Booking System (MERN Stack)

[Prescripto Project](#)

- Built a full-stack application with role-based authentication for Patients, Doctors, and Admins.
- Features include appointment booking, online payments, dashboards, and profile management.
- Technologies used: MongoDB, Express, React, Node.js, Tailwind CSS.

Flavor Table

[Flavor Table Project](#)

- Enhanced a recipe application by integrating user authentication, secure routes, and backend deployment.
- Utilized Node.js, Express.js, PostgreSQL, JWT, and Bcrypt.
- Conducted endpoint testing to ensure API reliability.
